After graduation, how will you launch a high-impact career?

Historically, Detroit students have not had access to an equitable education that adequately prepares them for college and career. Michigan Teacher Corps trains recent college graduates to become exceptional, certified teachers. Because of the high stakes for Detroit students, our rigorous training program expects a tremendous amount of our new teachers. Our fast-paced program focuses on the essential skills that teachers need most to start strong. Teachers will repeatedly practice foundational classroom management and instructional techniques, receive direct feedback from skilled coaches, and must pass an evaluation in order to be eligible to start teaching in the fall.

All of our Fellows teach and earn a full teacher’s salary and comprehensive benefits for the 2016-17 school year.
