for its Sponsorship and support of this program

The purpose of this course is to teach the clinician an Esthetic Diagnostic Index using specific Diagnostic Criteria to correctly diagnose and treatment plan patients who present for esthetic improvements. The Diagnostic Criteria include Angle Classification, Incisal Edge Position, A-P Jaw Relations, Occlusal Vertical Dimension, Midline Analysis, Smile Analysis, and Gingival Plane Analysis. This course is intended for prosthodontists, general dentists, and laboratory technicians.

Course Objectives:

At the conclusion of this course participants should be able to:

- Correctly apply the diagnostic criteria to all patients.
- Apply principles of complete denture esthetics to dentate patients.
- Know when and by how much OVD can be increased.

Accurately diagnose and treatment plan smile anomalies.

About the presenter:

Dr. Van Ramos is a Colonel in the United States Army Dental Corps and is the Program Director for the U.S. Army Prosthodontic Residency Program at Fort Gordon, Georgia. He is also the Prosthodontic Consultant to the Office of the Surgeon General for the U.S. Army. Dr. Ramos received his D.D.S. from the University of Texas Dental Branch at Houston in 1985 and his certificate in the Advanced Education Program in Prosthodontics from Walter Reed Army Medical Center in 1994. He is a Diplomate of The American Board of Prosthodontics, a Fellow in the American College of Prosthodontists and the International College of Dentists. Additionally, Dr. Ramos is member of the American Academy of Fixed Prosthodontics and the American Dental Association. Dr. Ramos lectures nationally and internationally on esthetics and implant dentistry.
