Future Teachers
wanted for afterschool programs

What: Sixteenth Street Community Health Center’s Department of Environmental Health is recruiting facilitators for the KK River Watershed Explorers afterschool program. This place-based environmental education curriculum is focused on raising students’ awareness about issues surrounding water, flooding, and urban ecology. Students will be provided with the skills to enjoy urban natural areas while also being able to make a difference within their community.

Who: Marquette students are desired to teach 4th and 5th grade students. While the classes are taught in English, candidates with conversational Spanish skills are preferred. An hourly wage will be provided.

When: One school’s program is Mondays and Wednesdays; the other school’s program will be Tuesdays and Thursdays. Both will require facilitator attendance from approximately 3:15 to 5:15. Lesson planning and materials purchasing will be done by Department staff. Applicants will be considered for facilitating one or both programs. A few sessions will require later evenings for outdoor education trips on the KK River Trail.

Where: Sessions will meet at either of our two Southside partners: Lincoln Avenue Elementary School or Windlake Elementary with occasional outings to Pulaski Park and the KK River Trail.

If you are interested, please call Kevin Engstrom at 414-385-3737 (please use 414-897-5598 after January 21) or email kevin.engstrom@sschc.org
