

Windows VPN Installation/Usage Instructions

Marquette VPN connects you to online resources restricted to the university campus while you are away from Marquette. The VPN is designed for students, faculty and staff who already have a commercial high-speed Internet service, such as [Road Runner](#). This secure connection from outside of Marquette is called a virtual private network or VPN.

To install the VPN client go to CheckMarq at <http://checkmarq.mu.edu/>
From the My Page, look for the Link Menu. Click Campus Downloads.
The Campus Downloads page appears. Click Download Cisco VPN for Windows.

After clicking on the link, your computer will ask you to save or open the file. Click **Save**.

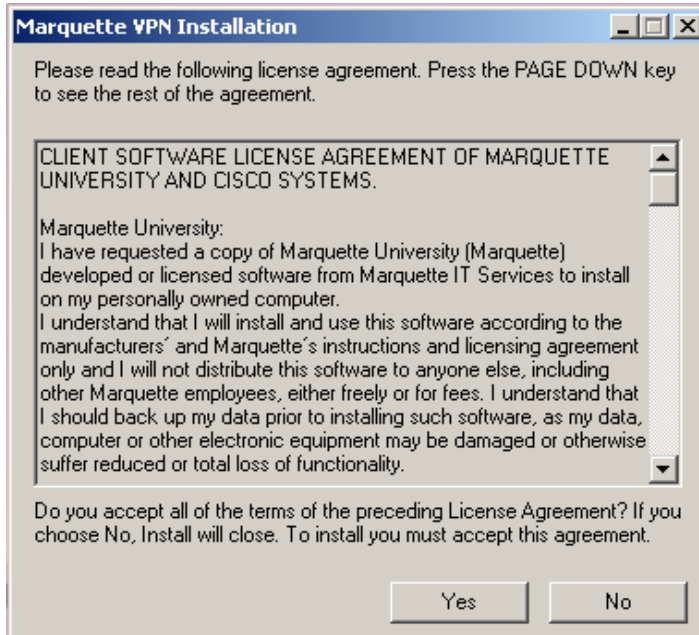

A new window will appear allowing you to choose the location for the file download. The recommended location is **My Desktop**.

Once you have downloaded the program to your desktop you will need to uninstall your old Cisco VPN client. **Go to Start, Control Panel.**

Click on **Add or Remove Programs**. Uninstall Cisco VPN Client. Reboot your machine.

Go to the location where you downloaded the Marquette VPN Client (i.e.: My Desktop) and double click on it to run the installer.

Click **Yes** to continue with the installation

The installer performs a silent install that does not require any user intervention. Once the installation is completed you will be asked to restart your computer.

Click on **Yes** to restart your computer.

Once your computer has restarted got to **Start, All Programs, Cisco System VPN Client, VPN Dialer** to start the VPN client.

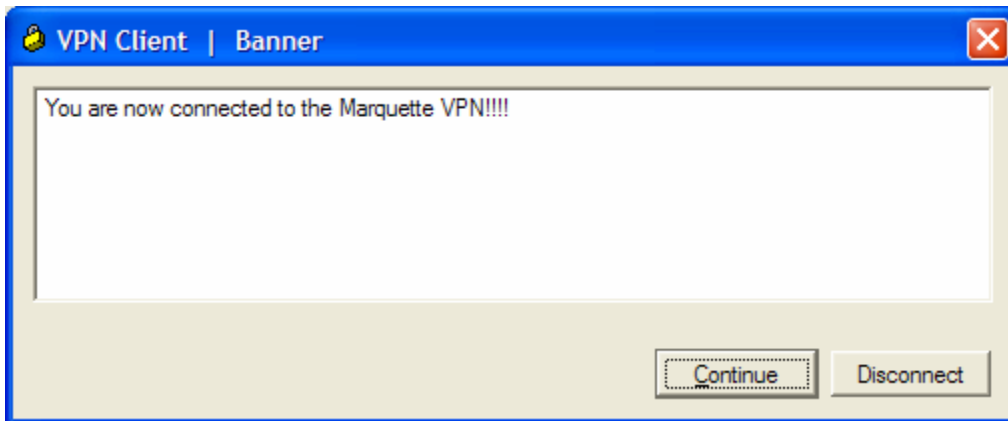

A new screen will appear. Double click on **MU AD**.

Enter eMarq username and add @marqnet.mu.edu to your username (e.g. 3219jonesj@marqnet.mu.edu). Enter your eMarq password and click **OK**.

Click **Continue** when you see this screen.

You are now connected. Your username should automatically appear on subsequent uses of the VPN client.
