Course Title: **Introduction to Theology**

**Description:**

Christian theology is faith seeking understanding. Those who already believe seek to understand their faith better in order to believe and live it better. Living it better includes being better able to help others to faith. Theology has as one of its tasks, then, to help those who do not believe to understand the Christian faith in case they might come to believe it. This course will be attentive to the desire of the believer for understanding, as well as to the understanding of the Christian faith that could be helpful for an unbeliever. Both this desire and these understandings imply a basic knowledge of what Christians believe. It is from this basic knowledge that one can arrive at a deeper understanding of Christian faith and even a deeper faith. The course aims at firming up this basic knowledge in a way that will help deepen the students’ understanding of it, whether or not they are believers.
