Course Title: The Bible through the Ages

Description:

In Christianity the Bible is considered God’s written revelation to humanity. As such, it has informed every aspect of the Christian life and history directly or indirectly. This course surveys how the bible was shaped, understood, and used from its Jewish origins, to the age of the early Church, medieval times, the Reformation and our own era. The study of the Bible in these periods will engage several topics including methods of biblical interpretation, the use of the Bible in worship and theology, and the role it played in shaping modernity.
