UNDERGRADUATE COURSE DESCRIPTION

Term: Spring 2015
Instructor: Lee Sytsma
Course #: THEO 2310
Sections: 102 and 103
Course Title: Exploration Christian Theology
Topic: Christianity and Science

Description:

This course addresses the relationship between Christian faith and the philosophy of science and scientific pursuit. It begins by examining the various historical interactions between faith and science, and then moves to examine controversies and debates in the modern context, including questions of human origins and the nature of miracles. Texts from Scripture, as well as various contemporary theologians and scientists will be used to develop a greater understanding of these topics.
