Goals

1) I want to increase the number of STEM conferences by reaching out to students in the STEM fields and encouraging them to bring in their research papers, lab reports, and research posters, to name a few.

2) I hope to develop more personal relationships with writers by inviting them to work with me on their next writing assignment in any field.

3) I aim to approach all conferences, whether or not I am familiar with the subject area of the assignment, with confidence that I can help writers in their writing process.
